Series 82
Turbo Powered by Somfy

The Oslo Series 82 Turbo Powered by Somfy pairs the light weight and stylish slim lines of the Oslo Series 81 motorised track with the power of Somfy's Glydea Ultra or Irimso battery motors.

Featuring an incredibly tight 150mm radius bend for a motorised track, the Oslo Series 82 system can be installed in areas other motorised tracks will not go. This system utilises the "Easy Clip" brackets that were specially designed for ease of installation while being concealed from view. The slimline design allows for curtain headings to sit flush with the ceiling hiding the track when closed.

Advantages:
Slimline.
Tight 150mm Radius.
Easy Clip Brackets.
Same motors and remotes as Somfy
WireFree (battery) or 3 and 4 core motors.
Integrates seamlessly with other Somfy track and blind systems.
Cost effective.
