

Series 99

Hospital Tacking

The Oslo Series 99 Hospital tracking system allows a large choice of configurations for bed screens in public and private hospitals, nursing homes, clinics and doctors surgeries. It can be attached directly to the ceiling, wall to wall with suspension tube supports or supports solely by suspension tubes.

The rigid design of hospital track allows for a maximum distance of 3m between supports. Available in clear anodised and white powder coated finish as standard, other colours available through powder coating at an extra cost.

In house degree bent with a 300mm radius. Oslo (QLD) can also fit a unique Quick Release slide to allow curtains and runners to be removed safely, swiftly and efficiently. Wheeled hook runner as standard. Clear wave runners optional on powder coated tracks.

Advantages:

- Ceiling or suspended options
- Degree bending at 300mm radius
- 4, 4.8 and 6m lengths

- Clear Anodised or white powder coated as standard; other powder coating options available

- Rigid design means greater distance between supports

- Hook runners as standard

- Ringed runners available

- Clear Wave options available on powder coated tracks
