

Series 51

Commercial

The Oslo Series 51 is a strong Commercial and Domestic tracking system widely used in the home and heavy use areas such as hotels, motels, hospitals, clubs and shops. It is designed to be used with anything from light weight sheers to heavy duty block outs. The track is supported with a comprehensive range of brackets giving you multiple choices to meet the various installation conditions that can arise.

The highly popular S-wave and standard runners are available in both hand and cord drawn options. Hand drawn tracks can be factory bent and curved to your specifications. Templates will need to be provided for any curved tracks while a drawing for degree bends is all that is required.

Available in White and Black as standard. Other colours available by powder coating.

Advantages:

Strong commercial grade.

Large range of brackets.

Cover plates for face fix brackets included as standard, hiding screws.

Roller Carriers.

Clear Wave Carriers.

Bendable – degree and continuous curve.
